Genius Port:
receive fire alarms anywhere, anytime.

With Genius Port, you can receive, evaluate, forward and acknowledge fire alarms anywhere and at any time. The system localises all alarm signals on your radio networked smoke detectors and forwards these to your mobile device and smart home systems of digitalSTROM.

Genius Port for Genius radio detectors

Genius Port ensures a reliable connection between Genius Plus X or Genius Hx radio-networked smoke detectors and your mobile device, thus keeping you informed about the status and enabling you to keep a close eye on your radio detectors. The Genius Control app allows you to call up additional functions and services so you always know where the alarm is being triggered.

Genius Plus X

This smart smoke detector meets the highest standards in terms of quality and reliability. Developed in one of Europe's most advanced fire safety laboratories, it fulfils the most stringent test criteria. Equipped with a radio module and used in combination with Genius Port, the Genius Plus X ensures the earliest possible alarm transmission in an emergency, even in large and multi-storey buildings.

### Genius Port – your benefits

- Alarm signals received on multiple mobile devices
- Fast muting of all detectors that have not detected smoke
- Continuous tracking of the fire thanks to individual detector monitoring
- Remote status messages possible in the event of a fault
- Simultaneous management of any number of radio systems and ports

Genius Port – typical applications

- Accommodation facilities, youth hostels, small hotels
- Nurseries and kindergartens
- Sheltered housing
- Small businesses, SMEs
- Private residential properties

Genius Port – properties

- Alarm transmission and acknowledgement function
- Status polling via mobile devices
- Multi-port and multi-user capability
- Compatible with Genius Plus X and Genius Hx
- Commissioning and configuration via app
- Available for iOS and Android
- Optimum security thanks to own cloud and TLS 1.2 encryption
- Connectivity: WLAN, Ethernet, USB, Bluetooth, digitalSTROM
- One-person maintenance
- Wall mounting
